THIS IS THE PLACE

KEY INFORMATION

PROJECT AIMS

- Improve active travel & access

- Provide outdoor learning facilities & opportunities

- Provide recreation & exercise pportunities

PROJECT START DATE
NOVEMBER 2020

ANTICIPATED COMPLETION
SUMMER 2021

TORYGLEN GREEN INFRASTRUCTURE

The £3.3 million pound investment project will transform circa 16 hectares of land into a mixed-use park and play areas, wetland, nature reserve, woodland and sustainable transport routes. The project will further enhance Malls Mire Community Woodland by improving accessibility and providing new facilities for outdoor learning and natural play.

The park will cater for both local and wider communities by providing a desirable, healthy location for outdoor recreation, volunteering, travel, education and relaxation.

Malls Mire is brought to you by Clyde Gateway, working with Urban Roots and our partners below. The contractor delivering the park is Idverde.

CLYDE GATEWAY

Clyde Gateway is Scotland's biggest and most ambitious regeneration programme, leading the way to achieving unparalleled social, economic and physical change across the east end of Glasgow and wider Rutherglen communities.

URBAN ROOTS

Urban Roots is a community led environmental charity working across the Southside of Glasgow. They have transformed numerous derelict or unused green spaces into blossoming community gardens, and their stewardship of Malls Mire Community Woodland has changed it into a thriving community run Local Nature Reserve.

IDVERDE

Europe's leading provider of grounds maintenance services and landscape creation projects, working with clients to deliver bespoke solutions for each project's unique challenges.
