

## **Workshop Agenda**

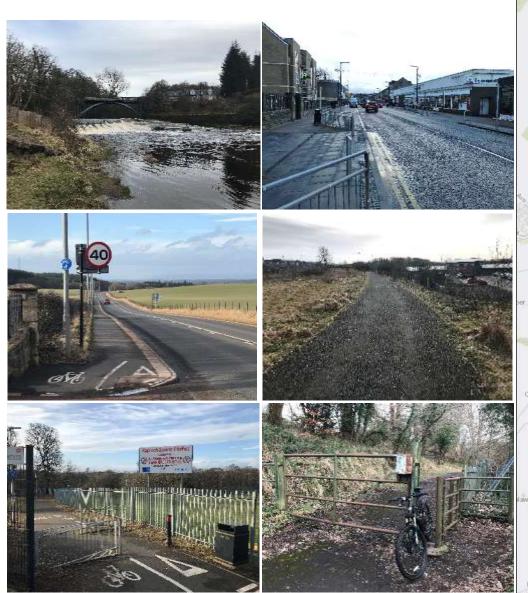

- 1. Introductions
- 2. AECOM Project Summary
- 3. Engagement and Consultation Summary
- 4. Future Network Priorities and Proposals
- Workshop Sessions / Discussions

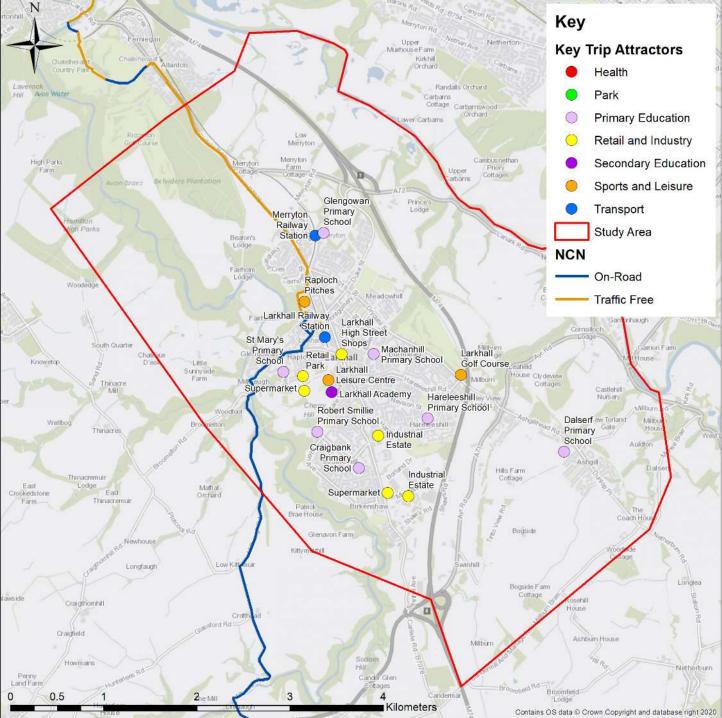

National Transport Strategy 2 (2020): Sustainable Transport Hierarchy

## **Study Area**

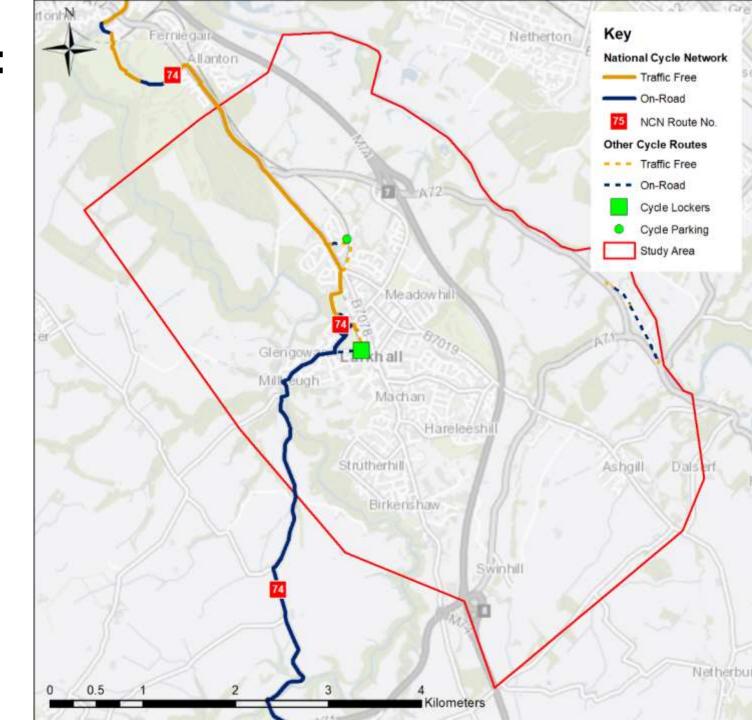

## **Existing Cycle Network:**

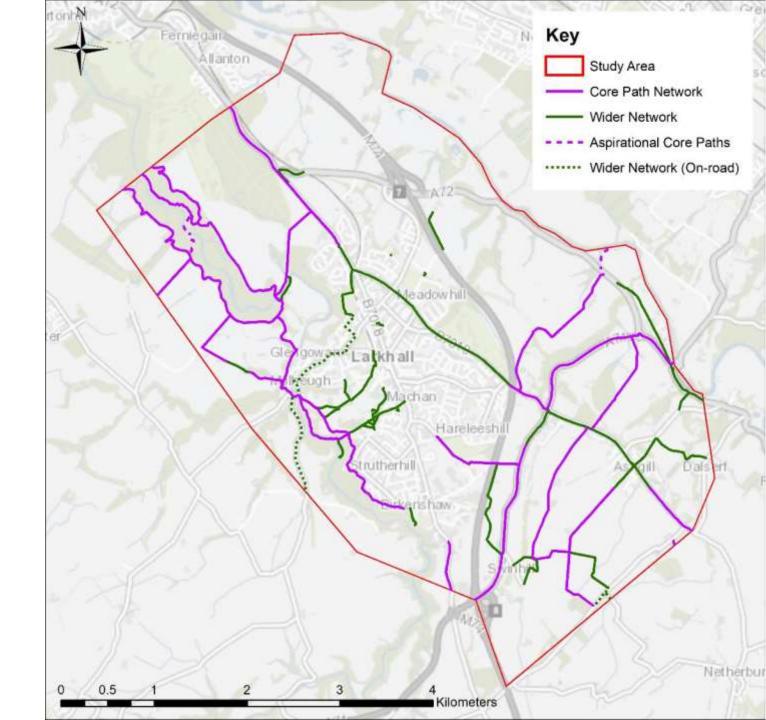

#### - NCN 74

- Shared use path along Carlsile Rd to Chatelherault
- Shared use path around Raploch pitches
- On-road residential streets between town centre and Avon Water
- On-road quiet country roads between Avon Water and Stonehouse
- Garrionbridge
  - Short shared-use paths links
  - Lanark Rd on-road signage
  - Filtered permeability
- Locally signed routes

# **Existing Network:**Core Path Network

- Wide ranging network of onroad and off-road core paths
- Aspirational core path links across A72 and Avon Water
- Significant wider network links along Burnhead Road and Drygate Street linking through Ashgill

## **Project Aims and Approach**

#### **Project Aims:**

- 1. Identify actual and perceived barriers to active travel locally
- 2. Identify programme of recommendations
- 3. Undertake engagement and consultation
- 4. Identification of future proposals

#### **Project Approach:**

- Technical Review
- Public and Stakeholder Engagement
- Network Development and Recommendation:
- Feedback from Stakeholders and the Public and Proposed Network and Priorities

## **AECOM Project Update**

#### **Background Review:**

- Study Area
- SIMD and Transport Poverty
- Commuting Data
- Key Trip Attractors
- Planned and Future Developments
- Policy Framework
- Current Active Travel Network
- Current Network Use

#### **Project Deliverables:**

- Public Life Survey
- Stakeholder and Public Engagement
- Identification of Future NetworkProposals
- Draft Feasibility Report
- Finalised Feasibility Report

## Stakeholder and Community Engagement

#### The engagement programme included:

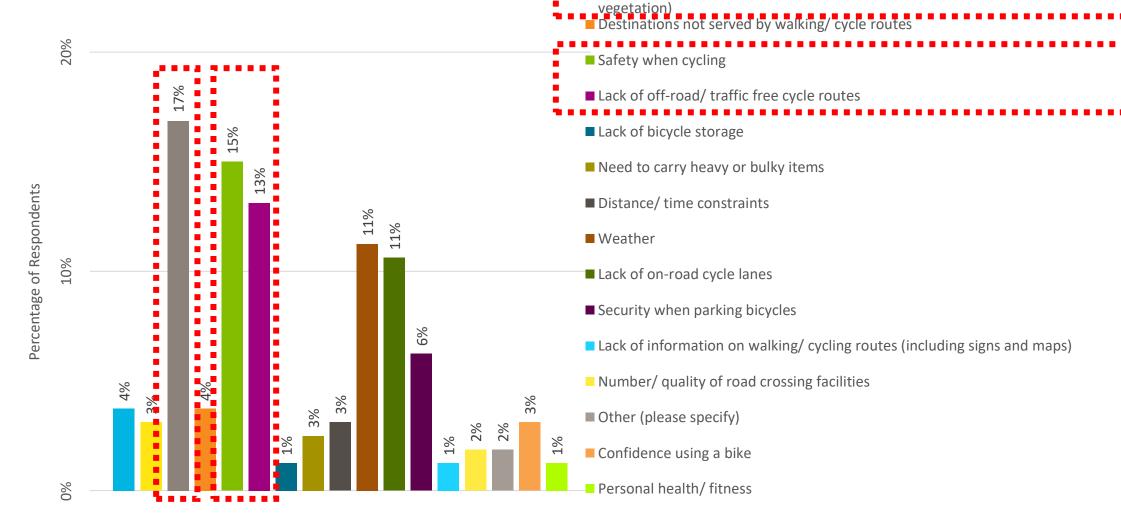

- An online questionnaire survey, to collate information on local travel (54 responses);
- An online Placecheck map for location-based comments and ideas (19 responses);
- 3. Key Stakeholder Workshop and Communications; and
- 4. Follow-up online consultation on Initial Draft Feasibility Studies (ongoing).

#### **Top Local Destinations**

- 1. Asda Larkhall (15.48%)
- 2. Larkhall Town Centre (10.32%)
- 3. Lidl (6.45%)
- 4. Larkhall Rail Station (5.16%)
- 5. Co-op Larkhall (3.87%)
- 6. Union Street (3.87%)
- 7. Larkhall Academy (3.23%)
- 8. Strutherhill (3.23%)
- 9. Millheugh (2.58%)

# Perceived barriers to walking and cycling in Larkhall

■ Terrain (e.g. too many hills)

Cost of cycling (including the cost of buying a bike and equipment)

■ Condition of roads, paths and cycle routes (including surfaces, lighting and overhanging

## **Extract from Additional Online Survey Comments**

- "Parking on pavements is a major problem in the area and there is zero enforcement"
- "Cycling infrastructure in Larkhall requires better connectivity to other areas with SLC. Road repairs need to be maintained to make roads safer to cycle on especially in regards to fixing potholes and drainage issues."
- "There might be better information on waking routes online but not everyone can access these. Having on site walking routes or greater signage/advertising might be beneficial to encourage walking /cycling outwith shops."

- "Walking cycling and horse riding and driving is increasingly dangerous due to fast and inconsiderate driving distance and lack of courtesy to other road users."
- "Any possibility of using sections of old railway lines should be investigated (for example, to Ashgill or Stonehouse)."

## Placecheck Map Comments

#### Entries could include:

- 1. Things I like;
- 2. Things I don't like; and
- 3. Things we need to work on

#### **Current Online Consultation**

Draft Feasibility Study and Proposed Network available for download online

Online survey available until 19<sup>th</sup> May 2021 asks for feedback on

- Proposed Draft Feasibility Study and Proposed Network
- Current travel patterns and restrictions linked to the COVID-19 outbreak

Feedback will be used to inform final Feasibility Study and Proposed Network

Council services A to Z Employee information

Home > Transport and streets > Public and community transport > Active travel online consultations

#### Active travel online consultations

We want to make it easier for residents to travel on foot and by bike more often for their local journeys, by improving the opportunities for and tackling barriers to active travel.

Creating high quality active travel infrastructure can deliver many benefits for the area; healthier citizens, more connected communities, reduced traffic congestion and better air quality.

To deliver improvements that meet the needs of those who will use them most, we need the views of local people. If you live, work, do business or travel in any of the following areas, please get involved. Tell us about your current experiences of active travel and what would encourage or help you or others that you know to walk, cycle and wheel more often.

Please complete our short survey to tell us a bit about how you travel.

We will use the information to provide a range of potential options for improving active travel.

The online surveys will run until Wednesday 19 May 2021.

#### Bothwell, Blantyre and Uddingston

View the draft Active Travel Study and please provide your feedback on our short survey.

#### Larkhall

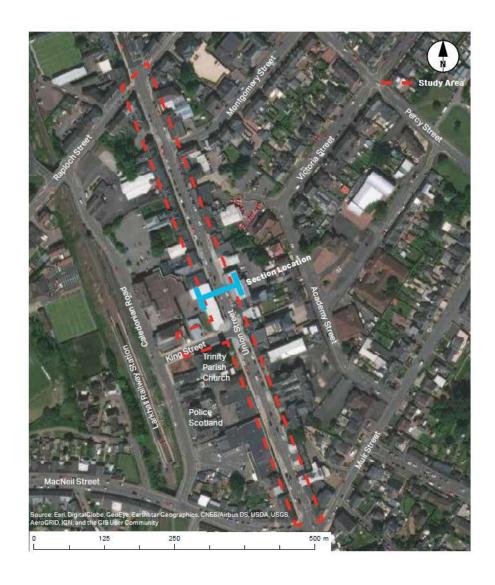

View the draft Active Travel Study and please provide your feedback on our short survey.

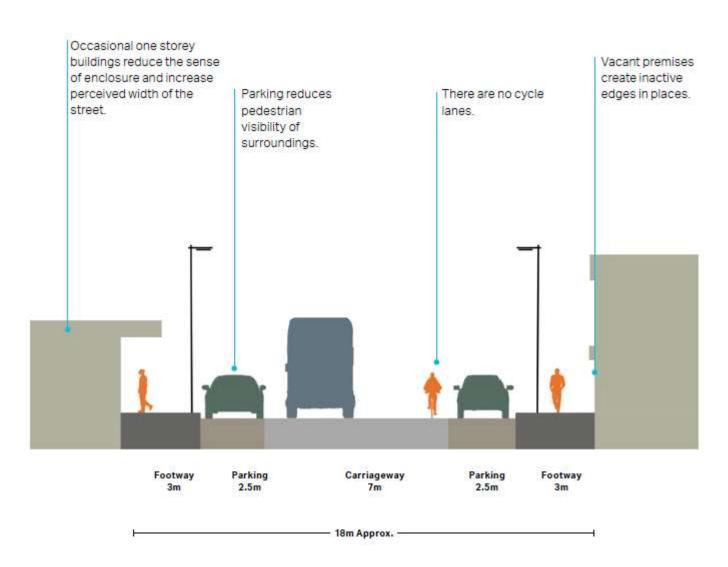

#### Strathaven, Stonehouse and the surrounding villages

View the draft Active Travel Study and please provide your feedback on our short survey.

## Public Life Survey: Twelve Quality Criteria Method

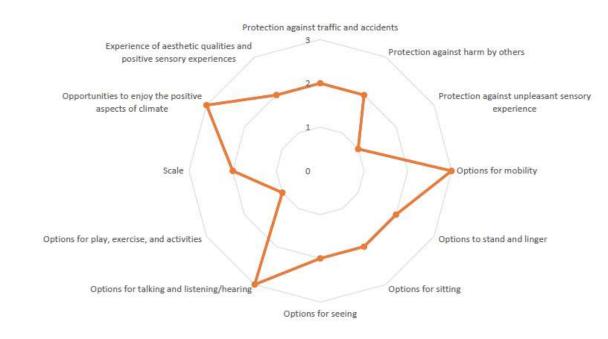

## Public Life Survey: Twelve Quality Criteria Method

#### **Summary**

 Judged to have low place function with a greater focus on movement

#### **Recommendations:**

- Reduce the scale of the street to increase enclosure and safety. This can be done by incorporating planting within streetscape.
- Address currently damaged streetscape materials

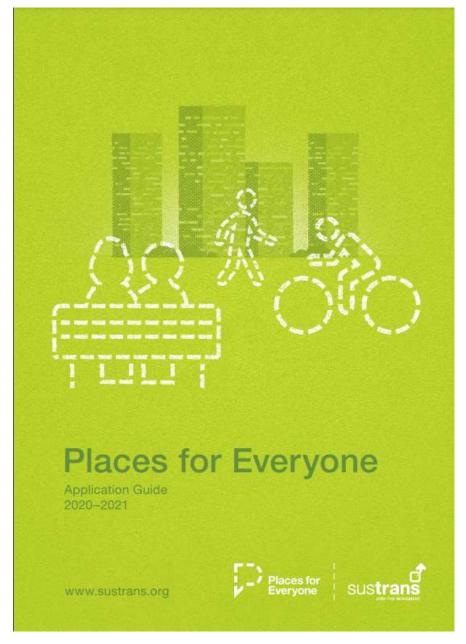

#### **Sustrans Places for Everyone Funding**

The aim of Places for Everyone is to create safer, more attractive, healthier places by increasing the number of trips made by walking, cycling and wheeling for everyday journeys.

#### Sustrans Project Funding:

- 100% of design (pre-construction costs)
- 70% match funding for construction

## Sustrans Places for Everyone Design Principles

In order to ensure all projects receiving funding make the largest possible impact, Sustrans has developed the following **design principles** to guide development:

- Develop ideas collaboratively and in partnership with communities
- 2. Facilitate independent walking, cycling and wheeling **for everyone**, including an 6. unaccompanied 12 year old
- 3. Design places that provide **enjoyment**, **comfort and protection**
- 4. Ensure access for all and **equality** of opportunity in public space

- 5. Ensure all proposals are developed in a way that is **context-specific** and **evidence-led** 
  - Reallocate road space, and restrict motor traffic permeability to prioritise people walking, cycling and wheeling over private motor vehicles

#### **Places for Everyone Design Stages**

Stage 0 – Strategic Definition

Stage 1 – Preparation and Brief

Stage 2 – Concept Design

Stage 3 – Developed Design

Stage 4 – Technical Design

Stage 5 – Construction

Stage 6 – Handover & Close Out

Stage 7 – In Use

## **Principles of the Proposed Network**

## The aim was to develop a plan and identify opportunities which:

- Address the concerns raised, enabling walking and cycling as a convenient choice for all trip types;
- Support local businesses and the economy;
- Are aligned with best practice in designing people friendly streets and spaces;
- Are in line with policy objectives at all levels of government; and
- Are likely to attract funding and/or takes advantage of planned changes.

#### **Core Design Principles:**

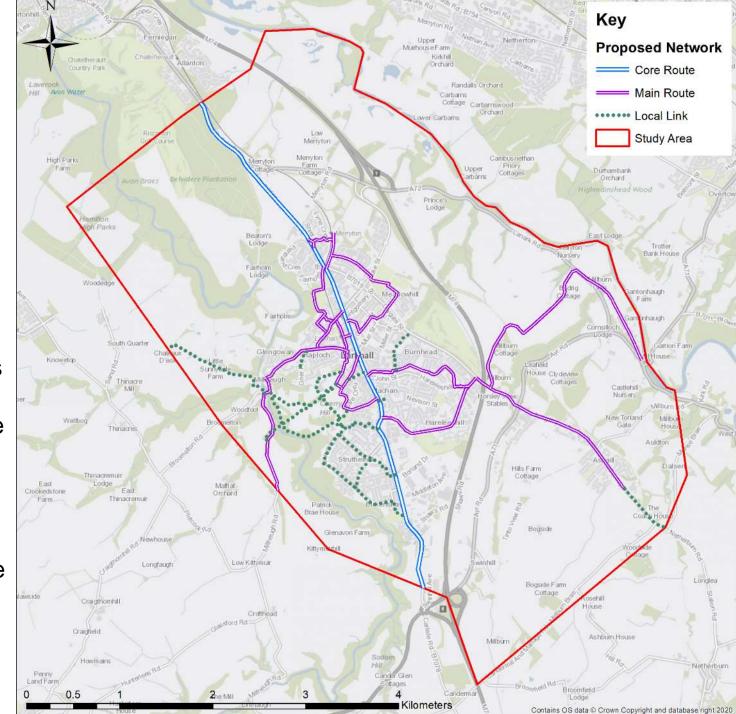

- Cohesion
- Directness
- Safety
- Comfort
- Attractiveness
- Adaptability / Future-proofing
- Accessibility

#### **Future Network Proposals**

Proposed network is split into 3 categories:

- Core Routes: these will include the proposed strategic cycle connections linking both within and beyond the study area along the main arterial routes.
- Main Routes: these will include further connections to major trip attractors such as schools, shopping centre and areas of employment and link to the wider and more strategic Core Routes.
- Local Links: will include additional links to local destinations and connect communities and local destinations that are not within close proximity to the propose Core and Main routes.

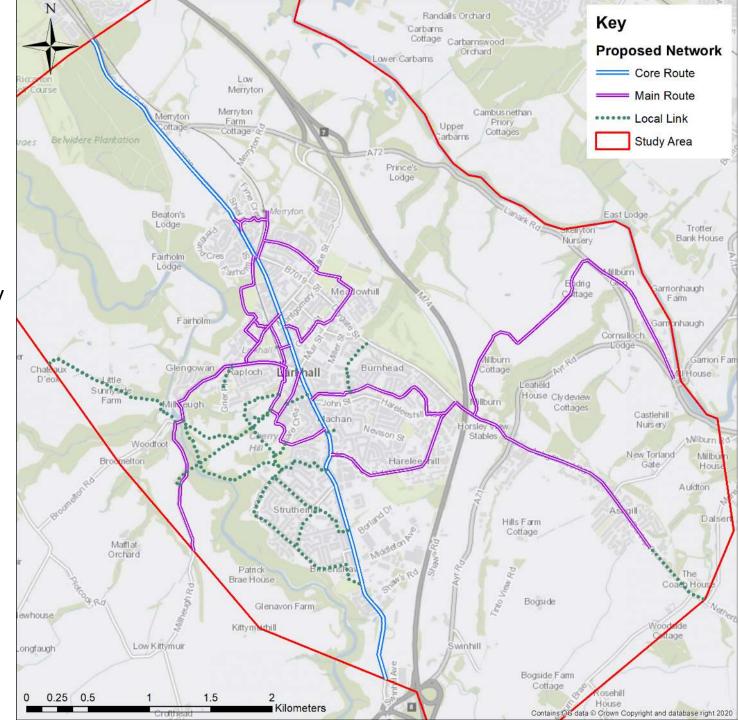

#### **Proposed Network:**

#### **Core Routes**

 Link would follow the main B7078 corridor north – south through the study area acting like a spine to allow the wider network to grow.

#### **Main Routes**

- Links to Merryton Station, Glengowan Primary School and the proposed Community Growth Area to the north of Merryton;
- Link connecting communities in the Meadowhill area with Merryton and Larkhall town centre.
- Link along the alignment of the existing NCN74 route connecting Raploch, the town centre and the rail station and down through Millheugh and across Avon Water;
- Link along Caledonian Road and King Street connecting the rail station and town centre; and connections around the Leisure Centre and Larkhall Academy.

## **Next Steps**

2020 / 21

#### **Current Works**

- Review Stakeholder Feedback
- Review Public Feedback
- Finalise and Publish Feasibility Study

#### 2021 / 22 and beyond

#### **Future Works**

 Development of proposed routes and networks in partnership with Sustrans and in consultation with local communities

## **Workshop Sessions**

#### 1. Barriers to Active Travel

What do you think are the main barriers to more walking, cycling and wheeling in Larkhall?

#### 2. Local Assets

What assets could we build upon to make the town more accessible for walking, wheeling or cycling?

#### 3. Known / Planned Changes

Are there any planned changes or interventions you are involved in or know about that could be relevant to active travel improvements locally?

#### 4. Ideas / Suggested Improvements

Do you have any ideas for specific improvements which would make a big difference to walking, cycling or wheeling locally?

#### 5. Further Comments

Do you have any further comments?

# Thank you for your time

If you have any further questions or would like to get in touch please contact:
